

Summary

Data Analyst with 5 years of experience delivering SQL-based data models, analytics workflows, and decision-support solutions. With a foundation in Theoretical Physics and an MBA, I bring a unique combination of technical depth and business understanding, enabling me to translate complex business questions into practical, data-driven solutions. Experienced in data modelling, metric definition, data quality, and scalable reporting, with a strong focus on transforming business requirements into trusted datasets and consistent reporting frameworks. Proven ability to partner with Product, Sales, Finance, and engineering teams to deliver solutions that support strategic decision-making.

Skills and Highlights of Qualifications

Data & Modeling

- Advanced SQL (joins, CTEs, window functions)
- Data modelling (star/snowflake schema)
- Data pipelines and ETL / ELT workflows
- Data validation, testing, and reconciliation
- Familiar with semantic layer concepts

Tools

- dbt
- Snowflake
- Git / GitHub
- Tableau, Excel
- Python (Pandas, NumPy)

Experience

Data Analyst - Pricing & Products | Moneris Solutions

July 2021 – Present

- Led end-to-end analytics delivery across 20+ projects annually (\$128M portfolio), partnering across business, finance and engineering teams — owning work from requirements gathering to testing, reporting and post-validation.
- Automated reporting workflows using SQL and Copilot, reducing manual effort by ~35% and improving reporting efficiency.
- Built and maintained SQL-based data models and structured datasets to support scalable BI reporting and analysis.
- Partnered with Product, engineering, and Finance to define business metrics and KPIs, translating evolving and often ambiguous requirements into data solutions that supported pricing, lifecycle, and GTM decisions.
- Developed reusable SQL queries and validation scripts to extract, transform, and reconcile large datasets.
- Designed and maintained Tableau dashboards and reports tracking KPIs across funnels, lifecycle stages, and revenue performance.
- Enabled self-serve analytics by building reusable data workflows and datasets, reducing reliance on ad-hoc requests.
- Introduced structured validation processes that reduced implementation discrepancies and post-release issues.
- Improved data quality by identifying inconsistencies across systems and implementing validation and testing processes.
- Translated business requirements into structured datasets and defined metrics to ensure consistent, trusted reporting across teams.

Business Data Analyst (Co-op) | MacPhie & Company

February 2021 – April 2021

- Analyzed operational data (projects, expenses, timesheets) to identify efficiency improvements and presented a comprehensive report.
- Collected and analyzed survey, focus group, interview, and mobile application (Actionable) data for clients across multiple industries.
- Co-created personal brand reports for CEO-level clients, prepared materials for health and safety training workshops and provided technical support.

Junior Business Analyst | Tarom Green Field Co.

February 2017 – March 2019

- Conducted market and cost-benefit analysis to support product launch, exceeded target by 12% in the first three months.
- Identified root causes of product returns, implemented process improvements and reduced return rate by 40%.
- Analyzed customer and operational data to support product and marketing decisions.

Education

Master of Business Administration (MBA)
Bachelor of Science in Theoretical Physics

Azad University, 2019
Rajae University, 2015

Certification

- PMI-PBA (2021)
- Google Data Analytics Certificate (2022)
- Agile (PMI - ACP) & Risk Management (PMI - RMP) Bootcamps (2024)
